

Appln. No. : 09/945,377
Filed : August 31, 2001

Amendments to the Drawings:

In the Office Action, the Examiner noted that the drawings fail to show reference numbers 405a, 405b, 422 and 442. In addition, Applicant notes that Figure 1 fails to show reference number 180 and Figure 2 fails to show reference number 215. The Examiner also objected to the drawing for failing to clearly describe how stop 260 is secured to aperture 435.

Accordingly, a clean set of amended drawings is filed herewith which includes replacement sheets. In particular, Figures 1, 2 and 4-7 have been amended to add the missing reference numbers. In addition, arrowheads have been added to various reference numbers (400, 405, 415, 420 and 440) to clarify the structure described in the specification. Furthermore, reference number 262 has been added to indicate a hole formed in the stop 260 for receiving a fastener that also extends through the aperture. No new matter is added by these changes to the drawings.
